Non-GAAP Measures

Non-GAAP measures presented include assets under administration, assets under management, book value per diluted common share, return on equity and figures that exclude acquisition-related expense items. Management believes that these non-GAAP measures will allow for a better evaluation of the operating performance of Canaccord’s business and facilitate meaningful comparison of results in the current period to those in prior periods and future periods. Figures that exclude acquisition-related expense items provide useful information by excluding certain items that may not be indicative of Canaccord’s core operating results. A limitation of utilizing these figures that exclude acquisition-related expense items is that the GAAP accounting effects of the acquisition-related expense items do in fact reflect the underlying financial results of Canaccord’s business and these effects should not be ignored in evaluating and analyzing Canaccord’s financial results. Therefore, management believes that Canaccord’s GAAP measures of financial performance and the respective non-GAAP measures should be considered together.

Acquisition-related expense items in the fourth quarter 2011 include $0.9 million of amortization of intangible assets in connection with the acquisition of Genuity Capital Markets. Acquisition-related expense items during the year ended March 31, 2011 include $11.0 million for acquisition-related costs and $5.1 million for the amortization of intangible assets related to the acquisition of Genuity Capital Markets, and $1.8 million costs incurred for the acquisition of The Balloch Group Limited.
